

Key Features

- Manufactured in Germany using the latest nano-technology
- Creates a super hydrophobic surface on roof tiles
- Comes with a 10 year guarantee & 25 year proven performance
- Creates a self-cleaning surface
- Highly breathable
- Prevents discolouration, efflorescence & frost damage
- Discourages the growth of algae, lichens & moss

Quality Standards

RENOTEC Roof Coating has undergone independent testing & has been proven to meet the following Quality Standards;

- EAD 040287-00-04:2018 - 25 year performance
- DIN EN ISO 53054 - tensile strength
- DIN EN ISO 7783-2 - water vapour permeability
- DIN EN ISO 1062/3 - water impermeability
- DIN EN ISO 4624 - pull-off test for adhesion

**10 year manufacturers
guarantee**

Transform & protect roof tiles

The ultimate waterproof roof coating

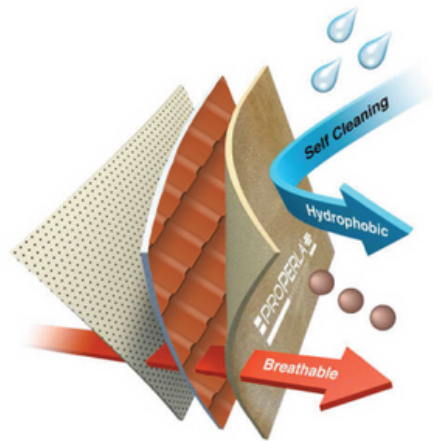

Super Hydrophobic Self-Cleaning

25 Year Proven Performance

Super Hydrophobic

RENOTEC Roof Coating is an external coloured roof coating which uses the latest nano-technology to create a super hydrophobic surface on roof tiles. Contrary to popular belief, roof tiles are porous, meaning they will absorb moisture. When rainwater falls on the roof treated with RENOTEC, it simply runs straight off without absorbing into the material, keeping the roof dry.

By keeping roof tiles dry RENOTEC Roof Coating extends the life span of the roof & prevents the loss of structural strength caused by the weathering of the tiles. This makes treating a roof with RENOTEC a cost-effective alternative to a roof replacement.

Breathable

RENOTEC Roof Coating has no restriction on air and moisture escaping the surface. It lines the pores of the substrate rather than sealing them, allowing water vapour to naturally breathe. It has an SD value of 0.03, which far surpasses the 0.50 which is considered breathable.

Self-Cleaning

Roof tiles that have been treated remain clean & attractive as the water repellent surface means any dirt is washed away with rainfall. RENOTEC Roof Coating also:

- Helps to prevent discolouration & salt efflorescence
- Makes it difficult for the growth of algae, lichens or moss on the roof tiles
- Slows the ageing of tiles
- Is unaffected by UV rays preventing fading

Colours

RENOTEC Roof Coating comes in a range of popular colours to help transform roofs from dirty & unattractive to looking like new.
